

## **SCRUTINY COMMITTEE REPORT**

Date Written	18 <sup>th</sup> March 2021
Report Author	Paul Davies
Service Area	Waste Services
Committee Date	12 <sup>th</sup> April 2021

*To: Chair, Ladies and Gentlemen*

### **Charging For Wheeled Bins**

#### **1.0 SUMMARY OF THE REPORT**

- 1.1 The report provides information on charging for the administration and delivery of replacement wheeled bins for refuse collection.

#### **2.0 RECOMMENDATION(S)**

- 2.1 The content of this report to be discussed and noted.

#### **3.0 INTRODUCTION AND BACKGROUND**

- 3.1 In 2019 an outline business plan was presented to council with regards to charging for the delivery and administration for replacements wheeled bins. The report outlined the cost to the authority. The ownership of the wheeled bin remains with the authority the charge was associated with the delivery and administration involved in the process.
- 3.2 Evidence from collection crew and waste wardens identified that a large proportion of residents had more than one wheel bin within the property. Since the introduction of charges the volume of requests have decreased and this has saved the authority from purchasing wheeled bins and reduced the amount of man hours associated with the delivery.
- 3.3 Introducing charging for replacement wheel bins has provided some interesting data which concluded that the policy is working. Since the introduction of the charge in

2019, resident's behaviour in relation to taking responsibility of their wheel bin has changed as demand for new bins has decreased dramatically.

## 4.0 WHERE WE WERE

4.1 Prior to the introduction of charging for the administration and delivery of wheel bins, requests for wheeled bins were not scrutinised, this is identified in the number of requests.

4.2 Here is an example of a 3 months snap shot before and since charges were introduced. The figures indicate that residents are now taking far more responsibility for their wheel bin.

Requests prior to charging = 01/01/2019 – 31/03/2019 = **266**

Requests since charging = 01/04/2019 – 30/06/2019 = **63**

## 5.0 WHERE WE ARE NOW

As you can see from the table below since introducing charges there has been an annual saving of 12k to the authority.

	Volume	Income	Cost	Net	Saving compared to 18/19
18/19	884.00	-	11,403.60	11,403.60	-
19/20	467.00	- 7,005.00	5,604.00	- 1,401.00	- 12,804.60
20/21	489.00	- 7,335.00	6,308.10	- 1,026.90	- 12,430.50

## 6.0 WHERE WE WANT TO BE

6.1 We want to be in a position where residents take responsibility for the receptacles that the authority supply.

6.2 The authority wants to be in a cost neutral situation with regards to wheel bins.

## 7.0 WHAT WE NEED TO DO NEXT

7.1 The waste management department are continually looking to improve the way we collect waste and provide a service to the public to make it easy for the residents and safe for its employees.

7.2 Continue to monitor requests and deal with all requests on merit.

- 7.3 Continue to look at new initiatives to make it easy for the resident to reuse and recycle.
- 7.4 Amend and improve collection points to will reduce wheel bins being misplaced or stolen and the need for residents to pay for replacements.

**8.0 CONTRIBUTION TO WELLBEING OBJECTIVES**

- 8.1 Waste Services contributes to the Council’s environmental wellbeing objective; communities protect, enhance and promote our environment and countryside.
